'Innovations in Food Safety & Processing' Seminars Set for April

PITMAN, N.J. (Coperion K-Tron) — Coperion K-Tron, in collaboration with key suppliers of equipment and instrumentation to the food processing industry, including Eriez, ROTEX and Coperion, announce the joint presentation of complimentary food processing seminars, “Innovations in Food Safety & Processing," to be held on April 22, 2014 at the Hyatt Rosemont near O‘Hare in Rosemont, Illinois and on April 24, 2014 at the Four Points by Sheraton in Kansas City, Missouri. For more seminar information and to register online visit www.coperionktron.com/foodprocess [1]

This free one-day event will include detailed process and analytical information about key topics and trends in the food processing industry. Seminar examines a wide variety of important processing issues, offering an objective technical overview of these processes, introducing processors to methods of both improving current processes and utilizing new technologies.

Seminar topics include:

- “How Automation of Your Food Process Can Improve Product Quality and Overall Process Efficiency and Safety“ - Coperion K-Tron - (Feeding & Conveying)
- “Gyratory Sifters in Food Applications“ – ROTEX - (Screening / Separation)
- “Contaminant Removal Technology“ – Eriez – (Metal Detection / Magnetic Separation)
- “Food Extrusion on Co-Rotating Twin Screw Extruders“ – Coperion – (Food Extrusion)

For additional seminar information and to register online please visit www.coperionktron.com/foodprocess [1].

Coperion K-Tron *[2] is a global leader and single source supplier of material handling and feeding systems. Coperion K-Tron has defined the leading edge of technology for material handling applications in the process industries.
