## Tyson Completes \$14M Investment in Va. Plant

RICHMOND, Va. (AP) — Tyson Foods Inc. says it has completed a \$14 million investment to increase production capacity at its Hanover County poultry plant.

In addition to installing new equipment, the Arkansas-based company says it also hired 120 additional employees at the plant, increasing its employment to about 760.

The 177,000-square-foot plant produces rotisserie chickens, breast filets, tenders and thighs for food service customers such as restaurants.

[The Richmond Times-Dispatch](#) [1] reports that the improvements were part of larger group of expansion and investment projects at the company's multiple facilities.
