

Consumer Trends: McCormick Canada Predicts Top 2014 Flavor Trends

LONDON, Ontario (CNW) — Marking its parent company's 125th global anniversary as a food industry innovator, McCormick Canada, a leader in flavor, celebrates the tastes that bring us together by unveiling the McCormick® Flavour Forecast™ 2014: 125th Global Anniversary Edition.

The report, developed annually by McCormick experts around the world, highlights five top food trends and more than a dozen emerging flavors predicted to impact the way we eat in the coming years. First launched in 2000, this anniversary edition explores how today's unparalleled connectivity is driving faster-than-ever adoption of new trends and tastes around the globe.

"People everywhere are beginning to show a growing appreciation for chilies from around the globe, not only for their heat, but for the unique flavor they add to our favourite dishes", says Michael Cloutier, Executive Corporate Chef of McCormick Canada. "In Canada, we are seeing a much greater variety of chilies in homes and on menus than ever before, from milder, flavourful kinds such as the Mexican Guajillo chili pepper to the more assertive Chinese Tien Tsin hot Sichuan chili pepper. We're also exploring different ways to enjoy them, from smoked chili oils, to pickled, and even candied."
