## **ND Company Recalls 2,664 Pounds of Beef Franks**

BISMARCK, N.D. (AP) — A North Dakota company has recalled more than a ton of beef franks due to misbranding.

The United States Department of Agriculture's Food Safety and Inspection Service says Cloverdale Foods Co. in Mandan recalled 2,664 pounds of beef franks.

The agency says the hot dogs were made with milk, which was not declared on the product label. Milk is a known allergen.

There have no reports of illness from the recalled products.

The items identified in the recall were "Seattle Mariners Beef Franks." The products were produced on Nov. 23 and Dec. 13, 2013.

The franks can be identified by the establishment number "Est. 7603" inside the USDA mark of inspection.

The products were sold to retailers in Montana, North Dakota and Washington.
