

Semi-Automatic Filler

Liqui-Box 900, a semi-automatic filler, delivers fast and accurate filling, easy-to-use controls and ergonomic, 5-gallon filling at up to 4 bags per minute, making it the ideal filler for start-up and low-volume beverage and juice filling operations. Product features a modern touchscreen user interface to ensure ease of operation and a standard vacuum and nitrogen purge system that protects customer's valuable products. Product is geared toward the Asian market.
