[Report Offers Framework to Analyze Effects of Possible Changes to US Food System](#)

January 23, 2015 3:45 pm | by Kari Imberg, Associate Editor, Food Manufacturing

To assist U.S. regulators on decisions about the nation's food system, the Institute of Medicine and National Research Council issued a new report. The study focuses on assessing the health, environmental, social and economic effects of proposed changes to the system.

[New Video Examines Role of Technology in Raising Animals](#)

January 23, 2015 3:15 pm | by North American Meat Institute

The use of modern technologies to raise animals has come under scrutiny in recent years as some call for a return to "simpler" practices. A new video examines the role of technology in raising animals and challenges the claim that a return to lower tech livestock production and processing would improve our food supply.

[Sustainability is Challenged as Many Renewable Resources Max Out](#)

January 23, 2015 9:45 am | by MICHIGAN STATE UNIVERSITY

The days of assuming natural resources can be swapped in and out to solve shortages — corn for oil, soy for beef — may be over. Scientists found that many key resources have peaked in productivity, pointing to the conclusion that "renewable" is not synonymous with "unlimited."

[American Shoppers Unlikely to See Benefit From Euro's Drop](#)

January 23, 2015 8:30 am | by SCOTT MAYEROWITZ, ANNE D'INNOCENZIO, AP Business Writers

Americans hoping to save on European goods thanks to a falling euro shouldn't rush to uncork that bottle of French Bordeaux. There's very little to celebrate. There's simply too much demand in the U.S. for any markdowns.

[Ultra-High Pressure Processing May Increase Salmon Shelf-Life](#)

January 21, 2015 12:00 pm | by Kari Imberg, Associate Editor, Food Manufacturing

Although salmon is often vacuum-packed, smoked, frozen or even canned to help increase the shelf life, the quality of the meat is often decreased during these processes. Researchers found that meat treated with UHP can increase the shelf life while improving taste.
