

Functional Fruit Ingredients

Lindsey Jahn, Associate Editor

URC® fruit concepts combine the flavor of real fruit with the health benefits of functional ingredients. There are three varieties:

- URC® Fruit & Protein — Fruit enriched with milk and pea proteins
- URC® Fruit & Energy — Fruit with natural caffeine from green coffee and guarana
- URC® Fruit & Fiber — With natural fiber from fruit and healthy grains

These ingredients are suitable for creating delicious and nutritious bagged snacks and snack bars, and are available in different shapes and sizes for inclusion in applications like chocolate, baked goods and breakfast cereals. These ingredients contain no fat and no added sugar.
