

Shaking Incubator

Lindsey Jahn, Associate Editor

The AccuTherm™ Microtube Shaking Incubator is a temperature-controlled lab vortexer utilizing peltier technology to rapidly heat and cool precious samples. An intuitive control panel with large color display allows users to easily program and view temperature, time and speed settings, while eight interchangeable aluminum blocks accommodate PCR plates and tube sizes from 0.2 mL to 15 mL. Other product features include:

- Temperature setting range of 0-105°C
- Mixing speed range of 300-1,500 rpm
- Heating time of 6.5°C/minute
- Cooling time of 1.5°C/minute
- Compact footprint measures 12.9 x 6.5 x 9.8 inches
