

Signal Stack Light

Lindsey Jahn, Associate Editor

The WAL-TL-3X12W-C LED Signal Stack Light is approved for use in wet locations. This waterproof LED equipped light is designed for process status indication in manufacturing facilities. The light housings are fully sealed within a waterproof aluminum chassis that features a small profile for easy and unobtrusive mounting in tight and space limited areas. The mounting plate also is made from aluminum and can be custom built to specifications. This multi-colored unit provides red, amber and green light outputs, has a 50,000-hour operational life and is available in 120-277 VAC. A 12/24 VDC configuration for low-voltage operation also is offered.
