

# Aseptic Beverage Packaging

Lindsey Jahn, Associate Editor

Air Aseptic Clear packaging makes the beverage product visible to the consumer. Transparent and aseptic, the packaging is suitable for non-carbonated soft drinks like lemonade and iced tea. Transparency and printability allow the producer to decide how much of the product to show. Product is lightweight and has a low environmental impact. Once emptied, it becomes flat like an envelope, which means less waste volume. Product is available in 200 ml and 250 ml capacity.
