

Stainless Wall Mount Enclosures

Lindsey Jahn, Associate Editor

The HWSSHK 304 and 316L stainless steel wall mount enclosures are available in 30 sizes, ranging from 24" x 20" x 6" to 60" x 36" x 16". They offer corrosion resistance that does not degrade after scratching or other surface damage with high resistance to chemical attack. Sealed to NEMA 4X (IP66), the units are UV resistant and are stronger and more vandal-proof than GRP alternatives. They are designed for installation in harsh industrial environments like the water industry and process control applications. One benefit is the three-point heavy-duty padlockable handle mechanism, which gives optimum sealing with minimum effort in opening and closing the door. They are suitable for housing both electrical equipment and electronic systems.
