

## Bin Activator

Lindsey Jahn, Associate Editor

Bin activator for bulk handling includes a dished head contour, forged hanger suspension system, pre-assembled mounting ring, beaded sleeve and oil-lubricated gyrator. Beaded sleeve is molded in one piece with four retaining beads and can withstand 10 psi internal pressure. Oil-lubricated gyrator results in quiet operation and long service life. External support brackets are carbon steel. For use with contact materials of carbon steel, 304 and 316 stainless steel and abrasion-resistant steel. For use with standard motors 230 or 460/3/60 totally enclosed non-vented supplied with 6-ft. neoprene-covered cable. Standard flexible sleeves of Black Nordel or Neoprene 2-ply polyester for temperatures to 325°F.
