

Case Sealer for Snack Manufacturers

Lindsey Jahn, Associate Editor

The Model 436 case sealer allows snack packagers to easily switch from one sealing method to another without excessive down time or added expense of purchasing two machines. The unit has independent sealing modules for adhesive and tape sealing that are designed for quick changeover with "drop in" accessibility, allowing maintenance personnel to quickly make the switch from one sealing method to another. The system offers a large case range from 8" L x 6" W x 4" H to 24" L x 17" W x 17" H and speeds to 50 cases/minute.
