

Drum and Tote Oven

Lindsey Jahn, Associate Editor

The Sahara Hot Room Model S32 quickly melts material in drums or totes that have been chilled by cold weather. The oven heats and speeds the flow of thick or viscous materials. It can heat 32 drums on pallets or eight totes with saturated steam up to 200 psig. Hot oil or hot water can also be used as the heating medium. The heating capability of each unit is designed based on user needs. This model is designed to quickly and safely heat hard-to-melt materials. It is fully insulated and features rugged steel construction, built-in spill containment and is portable. Options include:

- Air circulation
- Exhaust capabilities
- Precise digital temperature control with overtemp protection
- Outdoor use package
