

Explosion Proof LED Light

Lindsey Jahn, Associate Editor

The EPL-PM-150LED-X24I-100 Explosion Proof LED Light with encapsulated inline transformer is Class 1 Division 1 & 2 and Class 2 Division 1 & 2 rated. This portable light is mounted within an A-frame portable stand constructed from non-sparking aluminum and powder coated for increased durability and corrosion resistance. The unit produces a brilliant flood pattern of light that is suited for illuminating enclosed areas and hazardous locations where flammable vapors, gases and dusts may be present. The fixture is comprised of a 16" wide by 14" tall rectangle light head mounted within a pedestal base stand with a convenient carrying handle built into the top of the stand. The lamp produces 12,000 lumens with a color temperature of 6000K and a color rendering index of 70, which produces colors and details much more accurately than high pressure sodium or mercury vapor lamps.
