

# Pallet, Sleeve and Top Cap System

Lindsey Jahn, Associate Editor

The 1000 x 1200 CS CISC OPTE Bulk provides a bulk packaging solution to store, handle and ship food and beverage products. Product features an active latch that enables workers to engage and release the sleeve from the pallet from a standing position with no bending required. When collapsed, the sleeve nests within the pallet and top cap and is fully self-contained for efficient return transportation. As a result, 50% more collapsed systems can fit in a standard 53' trailer than alternative bulk packaging systems. Product:

- Optimizes return transportation/efficiency.
- Provides a hygienic handling solution with smooth, all-plastic, highly cleanable, sealed-edge sleeves.
- Provides optimum load capacity ratings.
- Reduces product damage with solid, smooth pallet deck.
