

# Quick Change Mounting Plate

Lindsey Jahn, Associate Editor

The SWM LK Quick Change Mounting Plate is fully adaptable with every robot. It also features EOAT that is interchangeable with the plate. The versatility of the plate allows users to minimize downtime during installation, modifications or other setup changes. This product features lightweight, aluminum base plates and can be locked to ensure a secure foundation. EOAT grippers also stay aligned and secured in the plate. An integrated pneumatic quick disconnect system also has been incorporated in the design. A number of variations are suitable for a range of industries that move at a quick pace, including food and beverage.
