

Scraped Surface Heat Exchanger

Lindsey Jahn, Associate Editor

The Terlotherm Delta range scraped surface heat exchanger features new sizes, upgraded certified USDA hygienic design and increased heat transfer surface area. Product features include:

- UHT pasteurization of particulates up to 1" in size
- USDA Dairy and Poultry certification
- Magnetic, X-ray and metal detectable scraper blades
- Metal detectable gaskets
- Three 75 sq. ft. dual heat exchange cylinders packaged into one unit with a small footprint
- Bottom driven design, easy maintenance and no risk of oil contamination
- Low operating and maintenance costs
