

Warehouse Management Software

Lindsey Jahn, Associate Editor

Power Pick Global 4.0 Warehouse Management Software increases accuracy, efficiency, security and flexibility in automated storage and retrieval solutions. It can be configured for a single workstation as well as manage multiple work zones. Its scalable design can match user needs today and into the future, and can be customized to meet the exact needs of each application. The base package, KeyTech, provides simple storage and retrieval of goods, stock management, space management, simple reporting and easy management of user rights. More than 25 additional a la carte options include:

- Advanced reporting
- Batching
- Kiosk storage
- Label printing
- SAP integration
- Serial number handling
- Weight management
- Zone handling
