

Adjustable Racking System

Lindsey Jahn, Associate Editor

The STAK adjustable racking system offers flexibility in vertical storage, load capacity and space savings. Two systems are available:

- STAK - This base model for adjustable racking is comprised of a system of removable, adjustable pallets and a captive lifting and handling device that facilitates retrieval in as little as two minutes. One operator can efficiently manage loads weighing up to 2,000 lbs. in less than 250 sq. ft.
- 4K STAK - This system handles loads up to 4,000 lbs. It is available with or without ergonomic operator's cab.
