

Ergonomic Order Picking

Lindsey Jahn, Associate Editor

The Ergo-Label Beam is the blended, engineered design of two of Company's order picking solutions. It combines the comfortable, ergonomic order selection of the Ergo Beam® with the abuse resistance and barcode label protection inherent in the structural Label Beam®. This product is made from 4" structural steel channel with 1/8" recessed web for optimal durability. Standard pallet supports are used for both standard Ergo Beam and Ergo-Label Beam options. Other product features include:

- Adjustability on 2" centers
- Available lengths: 96" for 16" ergo opening or 102" for 22" ergo opening
- Suitable for first and second level order picking applications
- Creates easy access to rear carton location
- Prevents work injury and product breakage
- Improves order picking productivity
