

Laboratory Mixer

Lindsey Jahn, Associate Editor

The Silverson L5M-A is designed for all laboratory work, research and development, QA analysis and small-scale production in all industries. The system is suitable for a wide range of applications — mixing, emulsifying, homogenizing, disintegrating and dissolving — with an efficiency and flexibility unmatched by other machines. With a capacity from 1 mL up to 12 liters and the ability to mix in-line with flow rates up to 20 liters/minute, they offer excellent reproducibility when scaling up to full-scale production and provide an accurate and easy means of forecasting the performance of larger machines under full-scale working conditions. The multifunctional unit features touch screen control with digital tachometer, programmable integral timer and amperage display.
