

IP68-Rated Cables

Lindsey Jahn, Associate Editor

Thermo-Trex® 500-Plus 12 AWG Cord Sets are designed with a tear-resistant silicone jacket and fully-bonded silicone head providing an IP68-Rated seal against moisture. It is designed for applications where electrical connections are exposed to high temperatures up to 180°C, UV light, chemicals, moisture, dust and mechanical abuse. The product was designed to include extra long grounding pins to ensure first-in, last-out contact for safety, as well as stainless steel knurled coupling rings and a retaining washer that resists corrosion, and provides quick and secure assembly. The solid brass contact pins are nickel-coated and gold-plated for longer life, corrosion resistance and easier positive engagement.
