

Pantograph Reach Truck

This pantograph reach truck with a 3,500-4,500 lb. capacity offers lift speeds combined with high capacity retention, allowing loads to be staged at higher rack levels for warehouse efficiency and productivity. Product operators get a smooth, quiet ride. The reach truck combines advanced AC motor technology with vehicle software, optimizing performance and minimizing energy consumption. The hydraulic system delivers a fast published lift speed, in addition to variable reach and retract speeds. Product can handle loads at high lifts, reaching up to 450 inches. The lift truck is designed with a drive axle that evenly balances load weight for improved stability during cornering and when working at high lift heights. Product also features a rigid mast with cushioning at all mast stage transitions.
