

Vacuum Packaging Machine

MAX 42-S Table Top Vacuum Packaging Machine provides small processors with easy cleaning in a compact space. The MAX 42-S is one of a series of various vacuum packaging machines offered by the company. Product features include:

- Stainless steel design and state-of-the-art technology to make it easy to clean.
- User-friendly design features through individualized components that are clearly visible and easily accessible.

- Meets the hygienic requirements of the food industry.
- Quality products that are aesthetically-pleasing and made right on site, saving time.
- A high-pressure sealing system that is suitable for all conventional vacuum bags.
