

## Whey Protein

Company's advanced whey protein Lacprodan® DI-7017 is a 100% whey protein concentrate rich in the essential and branched chain amino acids that are scientifically proven to optimize the body's muscle-building and satiety response mechanisms. The ingredient offers quicker digestion time than casein, and is suitable for use in a range of great-tasting food and beverage applications, including long-life UHT drinks. Product is ideal for use in a comprehensive range of functional foods and drinks, including milk and water-based beverages and soups. It contains 100% whey protein, is UHT-stable, offers neutral pH and tastes good. These attributes make it especially attractive to manufacturers wishing to develop long shelf life products designed for weight management and the increase of muscle mass simultaneously.
