

## Filler/Depositor

Company's single piston filler/depositor is the classic workhorse of the baking and food processing industry. Product is versatile and gentle on all products. The large port openings permit filling of chunky ingredients without crushing. They are USDA and AG Canada/CFIA approved. The company has specialized in the design of fillers and depositors since it first opened. These labor-saving filler/depositors improve quality when depositing large, delicate particulates damage free. Product features include:

- 'Lift-Off' metering piston for rapid sanitizing
- Redesigned pneumatic system
- Enhanced operator friendly safety cover
- Air powered — consult factory for compressed air requirements
- 14 inches of height adjustment
- Locking swivel casters
- Stainless steel construction with all contact parts of food-approved materials
- Fills from fractions of an ounce to 64 ounces per piston with change cylinders
- Pneumatic dump system with interlocked safety cover
