

# Flexible Screw Conveyor

The flexible screw conveyor has been used in the dry processing industry for decades. This reliable and low maintenance conveyor uses a single moving part to convey dry material from one point to another. Product allows for horizontal, vertical and degreed bend applications. Engineered for batch, intermittent and continuous conveying of free and non-free flowing bulk materials. Product is an economical solution for conveying powders, crystals, pellets, friable material, flakes, granules and much more. The flexible outer tubing and auger allow for easy maneuvering into elevated hoppers and bending around other equipment and obstacles. Product conveys materials over distances up to 80 feet and discharge heights up to 40 feet. An optional mobile base provides a discharge height of 12 feet.
