

Vapor Proof Lights

These vapor proof string lights are hand lamps connected by 10 feet of cable between each unit, terminating in a 25 foot cable with a standard 5-15 straight blade plug. Product uses 100 watt incandescent bulbs. The units have a junction box at every 10 feet between the hand lamps. The units also have a 3 foot drop cord from the junction box to the actual hand lamp for extra maneuverability. The lights are constructed and certified to prevent water and/or moisture to enter the handle and head when used as instructed in wet locations. Rubberized handle improves operators grip and stainless steel mesh guard enclosures protects glass dome. Stainless hook enables operator to hang this task light overhead. OSHA requires that the light is plugged into a GFI protected outlet. Product is available in 120V, 60h, 220V, 50hz and 240/60hz.
