Wall Bracket

This wall bracket for tool storage is a stronger, more flexible hanging bracket designed to extend tool life and improve hygiene in production, restaurant and kitchen, retail and municipal environments. The correct storage of cleaning equipment ensures good hygiene practice. The company's modular-build wall-bracket system features a flexible design to suit user preferences, allowing either rubber clips or hooks to be installed. Available in two different sizes, the brackets can be extended as required by the addition of extra modules. Product has a 10kg load capacity. The components are made of FDA-approved materials and are fully dismountable for cleaning in a dishwasher or sterilizing in an autoclave.
