Bulk Bag Discharger

Patented system designed for discharging dehydrated vegetables. Unit features the exclusive Flo-Master™ bulk bag massaging system to promote material flow. A Flo-Lock™ discharge spout closure system quickly halts material flow for partial bag discharge, allowing bag to be retied and removed. Unit includes the exclusive stainless steel Seal-Master™ round bag spout access chamber with "gull wing" doors for easy operator access. Unit features a stainless steel Sure-Seal™ spout clamping system for dust-tight material discharge, and a stainless steel discharge hopper with bolt-on top cover. System includes pneumatic piping utilizing 304 stainless steel rigid air lines. Systems are custom designed for your specific application requirements.
