

Safety Footwear

Safety footwear are lifestyle-inspired and bring a new look to today's workers with the introduction of a skater-inspired silhouette. This new safety footwear are lifestyle-inspired and bring a new look to today's workers with the introduction of a skater-inspired silhouette. This new series features a younger, faster styling, delivering a modern safety style that excels in both comfort and design perfect for light industrial and manufacturing professions. The brand is built on the idea of creating multi-purpose hybrid footwear that blends form and function. This product provides advanced toe protection and performance from workday to weekend and everywhere in between. Highlighted by waterproof full-grain leather in several colorways and is available in both mid and low heights. Left and right asymmetrical steel toes are nested within the shoe to create a lower profile without sacrificing safety or comfort. Shoes are lined with a hydrophobic/hydrophilic 2-zone comfort technology providing superior breathability. Perfect for indoor environments, the shoe features a maximum underfoot surface area with an oil and slip-resistant non-marking rubber outsole. The series not only has both mid and low styles, but also includes an option that exceeds ASTM Mark II Non-Slip Testing Standard, helping to improve traction and reduce on-the-job slip hazards. For workers in service-minded industries, this product is available in a full black to suit wardrobe and uniform requirements.
