

Steel-Toe Socks

Company's new men's socks blend unique performance features with unparalleled comfort, creating the ultimate steel-toe sock. The work footwear are an inspired blend of both comfort and safety. Crafted from breathable, moisture-wicking Merino Wool, these utility socks are constructed with superior fit for all-day comfort. Designed with fit in mind, the socks feature a heel-hold cup construction for a more natural fit. Left and right design with contoured arch and impact cushioning in key areas provide additional comfort and reduce rubbing or abrasion. Product provides a seamless toe in the flex zone to avoid bunching and discomfort. The socks feature a unique, high-tenacity blend of fibers which weight for weight are 15 times stronger than steel. These fibers blended into the heel and toe areas provide superior comfort and durability. Armed with a lifetime guarantee, these socks are poised to outperform even the longest days on the job site.
