

Paper Display Pallets

Paper pallets are lightweight, clean, strong, purposed for export and exempt from IPPC and other regulations. Ideal for direct display needs, the units are neat, clean and nail-free, for easy use in a retail environment. Additionally, because they can be easily disposed of in standard compactors, there is no problem with disposal at store level. Whether it's a half-size pallet for an end-cap display or a custom-size pallet for a stand-alone display, the pallet can maximize efficiencies throughout the supply chain. The pallets are OSHA compliant and combine the strength of wood, the low weight of paper and the cleanliness and durability of plastic.
