

Modular Suction Cup

The new piGRIP™ suction cup allows companies to choose the ideal combination of lip and bellow so packaging lines can handle products at higher speeds while saving energy. Available with a wide range of independent lips, bellows and fittings in sizes from 25-77 mm, the product can be customized for various applications for full flexibility. The unit can be tailored to individual gripping, lifting and height requirements to handle a variety of products and fit with a number of packaging machines. The product is also available in FDA-approved materials.
