

Modulating Portable Chillers

The Iceman SM Series is a new line of high-efficiency modulating chillers available in capacities from 5 to 15 Hp. The series utilizes a compressor, capable of providing variable capacity output from 10% to 100% by axially separating internal scroll members. Additional features include:

- Insulated non-ferrous plumbing and components
- Air- and water-cooled condensing
- Microprocessor-based electronic controller
- Efficient brazed plate evaporator
- Heavy duty insulated tank
- Stainless steel centrifugal supply pump
- NEMA rated electrical enclosure with safety door disconnect switch
- UL 508A labeled electrical sub-panel
- NFPA 79 electrical safety standards
