

Compact IPC C12

Food Manufacturing Staff

The Compact IPC C12 is a new generation of Company's industrial PC. At the touch of a button, users can switch between the various applications or show or hide the touch-screen keyboard, for example. A fully sealed rubber USB port cover ensures that the device remains protected against dust and water. Unit provide the capacity for remote maintenance. The current operating status of all industrial PCs can be viewed via a software console.
