

DC Motors

Food Manufacturing Staff

Both IEC and NEMA frame motors are available from 1/50 to 500 HP, and custom-designed motors are available up to 3,000 HP. Company's round body DC motors have the same shaft height and mounting dimensions as competing units, making these an easy drop-in replacement. A full range of laminated frame DC motors, including explosion-proof designs, is also offered. The DMI DC motor is a laminated frame IEC product with ratings up to 1,400 Kw. Its smaller footprint allows it to be used in a variety of applications where space is an issue.
