

Packaging Tape For Cold Environments

Food Manufacturing Staff

Company offers a line of cold-temperature packaging tapes engineered for high performance in frigid environments. HP 132 Packaging Tape is specially formulated to keep packages sealed and secured, even in harsh, cold environments. It is designed with a synthetic rubber/resin hot melt adhesive that will provide an instant, permanent bond in sub-freezing temperatures. Applicable in temperatures ranging from 20°F to 75°F, the product is recommended for automated or manual packaging of lightweight cartons in cold-temperature environments. It is ideal for use in produce packaging, meat and poultry processing, dairy facilities and cold-weather storage facilities.
