

Portable Light Tower

The WALTP-CU12-4X150W-LED Quadpod Light Tower provides easy deployment and transport without sacrificing light output. Designed with LED light bar technology for high output and a tower assembly constructed from aluminum for light weight, the system can be deployed by a single person. Although smaller and lighter than comparable HID tower systems, this LED unit provides more than 59,000 lumens of light output. The system is fitted with four extreme duty LED light bars to effectively illuminate large-scale work areas. These light bars feature high output Cree LEDs, extruded aluminum housings, unbreakable polycarbonate lenses and are IP 68 rated waterproof.
