## Case Sealer

Food Manufacturing Staff

The Model 436 case sealer offers interchangeable tape and adhesive sealing on one machine. The modular design of this unit allows snack packagers to easily switch from one sealing method to another without excessive downtime or the added expense of purchasing two machines. The case sealer has independent sealing modules for adhesive and tape sealing that are designed for quick changeover with “drop in” accessibility, allowing maintenance personnel to make the switch from one sealing method to another in under 10 minutes. The sealer offers a large case range from 8” L x 6” W x 4” H to 24” L x 17” W x 17” H and speeds to 50 cases/minute.
