

Large Diameter Vacuum Cups

Food Manufacturing Staff

Large vacuum cups are available in sizes up to 15" in diameter to lift and manipulate large, bulky or cumbersome materials. Round, rectangular or oval cups are available from stock for a variety of lift manufacturers. Sizes and types are available to fit virtually any type of vacuum equipment used for lifting, manipulating or "pick in place" applications. Materials are available to suit nearly any application, including food handling. Company can quote custom designs from customer-supplied drawings or reverse engineer from customer-supplied cups.
