

Food Grade Conveyors

Food Manufacturing Staff

The new DynaClean™ line of belt food conveyors is engineered to fulfill the need for custom food grade conveyors that are easy to clean, energy efficient and reconfigurable. The line is designed and built to meet NSF, FDA, USDA and BISCC standards. They are fabricated with chemical and corrosion-resistant plastic, stainless steel and driven by Interroll's 113 Synchronous Drum Motor. They are engineered for speedy assembly and disassembly that allows conveyor reconfiguration when processing needs change. Utilizing the synchronous drum motors allows users to clean and sanitize to an optimal level in less than half the time it takes to clean a typical geared motor or conventional exposed drive.
