

## **IPPE Coverage: Food-Grade Checkweigher, Booth #3661**

Food Manufacturing Staff

Company introduces the Quick Check ZQ375, a checkweigher designed with food-grade, stainless steel construction to satisfy stringent sanitary regulations in food processing. With a robust, hygienic housing, highly visible, color-coded display and multi-connectivity operation, the unit offers an accurate, easy-to-use checkweighing solution. The system features NSF 3-A certification. With a smooth, polished surface finish, curved corners and an easy-to-remove cover, the unit allows for fast and effective cleaning, minimizing the growth of microorganisms on the scale and limiting food trap areas where bacteria can thrive. It employs a durable IP69K-rated enclosure with Gore-Tex® Vent technology to allow moisture buildup to escape and not be trapped inside the enclosure. This membrane is an industrial food-grade technology that ensures the unit is completely resistant to dust and water ingress in high pressure and heavy washdown applications.
