

# Sanitary Pumps

Food Manufacturing Staff

Sanitary Pumps offer application versatility. They are ideal for any application where bacteria and contamination must be avoided or frequent clean-up is required. Product features include:

- Quick disassembly design for easy cleaning
- No valves to clog or vapor lock
- Ability to handle thin liquids like soups and juices
- Efficiently moves viscous slurries like peanut butter, candies and jam
- Ability to handle fluid temperatures to 400° F and solids up to one inch in diameter
- 150 standard models meet 3A sanitary requirements
- Standard mechanical seals
- Close-coupled/open throat design
