

Epoxy for Food Applications from Master Bond

Master Bond

Master Bond Polymer System EP42HT-2FG is a room temperature setting, two component epoxy adhesive, sealant and coating specially formulated for food applications. It has been independently tested and certified by a leading national laboratory to meet the stringent requirements of FDA CFR 175.300. It was also toxicologically evaluated to meet the NSF/ANSI 51.4.1 (2009) standard for food equipment materials. EP42HT-2FG has wide applicability in the food industry.
